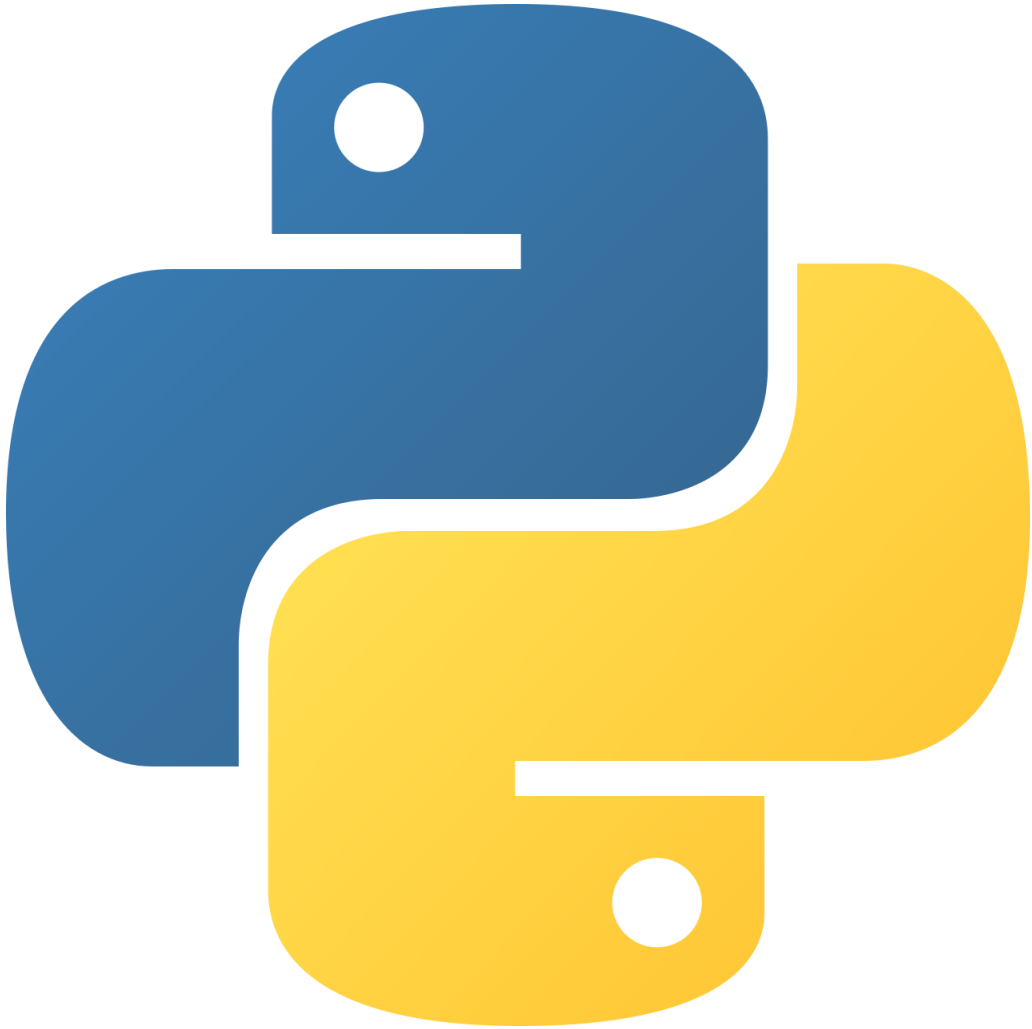
# Hello Everybody !

# Python

The programming language



**Javascript**

```javascript
function toto() {
    console.log("hello World !")
}
```

**PHP**

```php
function toto(){
    var_dump("hello World !")
}
```

**Rust**

```rust
fn toto(){
    println!("hello World !");
}
```

# Python :

```python
def toto():
    print('hello World!')
```

# Indentation

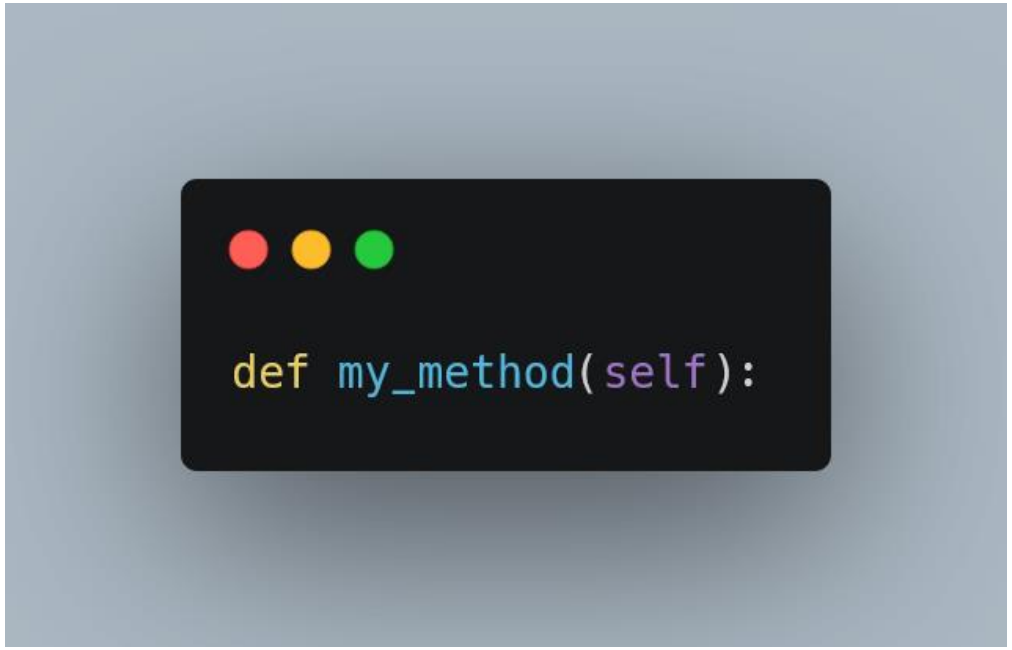
**All languages use curly brackets { }**

**Python uses... invisible spaces.**

Invisible characters, visible chaos.

# The self keyword

**Python is incredibly narcissistic :**



# Conclusion
